INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

PCT/EP2004/013687

Re Item V

Reasoned statement with regard to novelty, inventive step or industrial applicability; citations and explanations supporting such statement

Reference is made to the following documents:

- D1: EP-A-0 604 798 (AMERICAN CYANAMID COMPANY; BASF AKTIENGESELLSCHAFT) 6 July 1994 (1994-07-06)
- D2: DATABASE CA [Online] CHEMICAL ABSTRACTS SERVICE, COLUMBUS, OHIO, US; KUHN, D. G. ET AL: "Cycloalkyl-substituted amidrazones: a novel class of insect control agents" XP002330111 retrieved from STN Database accession no. 1998:294837
- D3: DATABASE CA [Online] CHEMICAL ABSTRACTS SERVICE, COLUMBUS, OHIO, US; FURCH, J. A. ET AL: "Amidrazones: a new class of coleopteran insecticides" XP002330112 retrieved from STN Database accession no. 1998:294826
- -Each of the documents D1-D3 discloses the insecticidal and acaricidal activity of compounds of formula (I) and their use for plant protection. The use of said compounds for combatting non-cop pests is not mentioned. The subject-matter of claims 1-14 is therefore new (Article 33(2) PCT).
- The subject-matter of claims 1-14 involves an inventive step in the sense of Article 33(3) PCT for the following reasons:

The present application solves the problem of providing new non-crop pest control agents, exhibiting broad spectrum activity against non-crop pests.

The experimental data demonstrate that the amidrazone of formula (I) are active against a broad spectrum of non-crop species, namely ants, flies, mosquitos, cockroaches, fleas, ticks and termites. Since N-arylamidrazones tested against crop pests have only average or poor activity against one or two insect or acaricid orders (D1) and since specific N-arylamidrazones have been reported as being effective against Coleoptera and/or Lepidoptera depending on the presence and the position of substituents (D2-D3), it could not have been predicted from any of the cited documents or any combination thereof that the amidrazones of formula (I) are effective against a broad spectrum of non-crop pests.

INTERNATIONAL PRELIMINARY REPORT ON PATENTABILITY (SEPARATE SHEET)

International application No.

PCT/EP2004/013687

-The subject-matter of claims 1-14 is considered to be industrially applicable and the present application is therefore considered to satisfy the criterion set forth in Article 33 (4) PCT.
